A storm to-morrow, no sea on I.

NEW ZEALAND.
We have Port Nicholson papers to the 25th ult. All was quiet in the south. RANGIATUA was endeavouring to raise a party, but the vigorous proceedings of Governor Grey had such an effect upon the natives, that even those hostile to the Government were afraid to exhibit their hostility by any overt acts. A court martial was sitting for the trial of some of the natives, who, after professing to be friendly, had joined the enemy. Two were convicted, one of whom was executed. The presence of the troops had caused a great demand for fresh meat: the contract for supplying them was taken at 11s. 6d. and 13s. 6d. per lb.

LEGISLATIVE COUNCIL.
TUESDAY.
The SPEAKER took the chair at half-past three.

PARTY PROCEEDINGS.
Mr. BLAND presented a petition from the members of the orders of Foresters, praying to be exempted from the operation of the Party Processions Bill.

The petition having been read, Mr. BLAND moved that it be received, and that the petition do not come into consideration.

The petition was received. Mr. BLAND presented a petition from John Macnamara, a free settler at Port Phillip, who had been dismissed from office in consequence of having his arm broken, and praying compensation for the same.

The petition was read and received. Mr. BLAND presented a petition from Mrs. Kinchela, widow of the late Judge Kinchela, praying for an annuity allowance.

MELBOURNE CORPORATION AMENDMENT ACT.

Captain O'CONNELL moved that the Council should go into Committee on the Melbourne Corporation Amendment Bill.

The Council then went into Committee on the Bill.

Captain O'CONNELL moved the consideration of the third clause, enacting that the Council should apply to such parts of the Act of Incorporation as were referred to in the Bill.

The clause was agreed to.

The schedule fixing the boundaries of the town, the preamble, and the title, were then agreed to, and after which the Council resumed, and the CHAIRMAN reported the Bill and amendments, and it was ordered to be read a third time on Tuesday next.

THE COLONIAL SECRETARY moved that the Party Processions Prevention Bill be read a third time.

The COLONIAL TREASURER seconded the motion.

Mr. BREWSTER: before this Bill was read a third time, he wished to take the opportunity to state that when he last expressed his disapproval of the Bill, it was on account of the fact that the Bill, as it stood, would have the effect of rendering illegal the meetings of many highly useful and laudable societies, such as the Anti-Slavery Society, the Temperance Society, and the like.

to the plaintiff; the Act gave the Court power to refer upon, upon the application of either party, and it was therefore a nullity; now no consent can be a nullity, and the Court, in its discretion, might refer upon this ground. After the evidence was given before the Master, the Master considered that the only object before him to consider was, whether there was an account stated between the parties, and he so decided, and confined himself to that and that only. He refused to go into any question of account. He then read the report respecting the order, and there found that there was no account settled between the parties, nor a balance found to be due to either of them. He contended, that the Master instead of obeying the order, had assumed a question of law instead of reporting the facts, and leaving the Court to draw the inference of law. The Council stated that he had proved before the Master that at one time there was a settled account, however it might have been disturbed.

The Council, in passing the decision, the decision of the Court on this part of the case, remarked that there were two questions before it. First, how far the affidavit might affect their decision; and, secondly, how far the Council would be justified in refusing to receive that affidavit. As the Court did not know of any precedent by which a part of an affidavit could be struck out, and there was nothing to prevent the affidavit being received, the decision of the Council was, that Mr. Windyey was entitled to go on.

The Court then adjourned for ten minutes. Mr. WINDYER then read Mr. Mitchell's affidavit, with several other documents which were submitted in support of his case, and addressed the Court at considerable length, contending that his client would be subjected to great hardship if the whole matter would be referred to the Court, and that he was willing to waive his right to a jury trial, and to have the matter decided by the Court.

Mr. FOSTER replied to Mr. Windyey, by reading the affidavit of his client, and contending that the Court should not receive the affidavit, and that the matter should be referred to a jury.

but notwithstanding this denial, it is manifest from his own statement that there has been great irregularity and impropriety in his mode of dealing with this portion of the testator's property. The circumstances of the case, without any person to control him, is of itself a suspicious circumstance. The giving of an order upon Thurlow to pay a sum, he admitted himself to be individually responsible for, and he drew the inference of law. The Council stated that he had proved before the Master that at one time there was a settled account, however it might have been disturbed.

Mr. WINDYER then read Mr. Mitchell's affidavit, with several other documents which were submitted in support of his case, and addressed the Court at considerable length, contending that his client would be subjected to great hardship if the whole matter would be referred to the Court, and that he was willing to waive his right to a jury trial, and to have the matter decided by the Court.

which had been addressed to the Mayor, and the reply of the Mayor, by which the meeting was convened—said, that although he must regret that other duties had called the Chief Magistrate away from Sydney on this day, he would endeavour, having been chosen by the meeting to preside as Chairman, to fulfil satisfactorily the duties of that office. The question which they were called upon now to consider was, whether the Mayor's absence would be a sufficient excuse for the meeting to adjourn, or whether it would be a sufficient excuse for the meeting to adjourn, or whether it would be a sufficient excuse for the meeting to adjourn.

the overflowing population of England; and that, as a matter for England's consideration in England, the petitioners' suggestions which had been made in England were very amiable; but to suppose that an outlet for that overflowing population could be found by this colony, or by any other colony or colonies, was a very great mistake; and that the population of England increased at the rate of a thousand per diem. How, he would ask, was it possible to provide an outlet by the means of the colonies? He said, "Increase! Emigration! would not decrease the population of England; its tendency would rather be to increase it. The prospect of emigration raised in the public mind a hope of better prospects for the progeny of the parent country, and consequently children were entered into, which otherwise would be avoided. It had been justly observed that in the colonies, where the time was so much common, induced numerous marriages, and while the population of China was reduced perhaps a thousand a year by infanticide, it was increased by a million in consequence of the natural increase. The same rate of emigration of infinitesimal doses of emigration might reduce the people of England, but it would not afford relief, would not get rid of a superabundant population. England was supposed to be a country of refuge, and she should, and might, find out some means of disposing of her offenders without having recourse to such dangerous expedients in the way of reformation as those she appeared to have adopted. The second objection, that many of those who subjected themselves to punishment were driven to offence by necessity—that they were indeed good men—yet that every ship-load of these convicts there would be a ship-load of the worst of the country, would not the others be contaminated before they arrived here. Again, the advantage offered to petty offenders for exposing themselves to be sent here would not be known or appreciated by the great majority of the population wanted here;—but hosts of artful thieves, pickpockets, and others of the same order, clever enough to commit only various crimes would present themselves at various countries, and would be sent to the colonies. He said that the little bit of money to transportation to the favoured land of Botany Bay. He grieved to say that there were some well-minded men who would not see the evils they were venturing upon, and that they were not to be trusted. An excellent clergyman on the subject, and the clergyman urged that something might be done, and therefore ought to be done, to reduce these convicts. Far different, however, was the opinion of the Rev. Mr. Gurney, who said that he would give me a hundred convicts, the man who while he made his demand laughed at them who, from far other motives, were supporting him; it was not such men as these that they would do good to. He said that he must set the effects of the impression which would act upon the minds of others, and while upon their sincerity, they would convince further, if possible. But all this would be to a great extent counteracted, and no effort should be prevented one of the brightest jewels of the Crown—a this colony from being contaminated, corrupted. Enough of the population of England would be sent to prove a most mischievous expedient; and although it was doubtless very grievous that thousands should be in want in the mother country and driven to crime; yet it was not such a great evil as to send thousands to the colonies. He said that he would persuade the people of New South Wales that the New South Wales could cure this great evil of the United Kingdom. The vice, the disease, must be arrested;—and where was the remedy? He said that he possessed no wisdom which had greater power, but he would better calculated to arrest the vice and this disease than England. If immigration was necessary to this country, it was necessary to force the payment of the men who wished to increase their flock, and he said that he would pay for the servants who were to tend them as well would it be for the merchant who saw his wealth increasing, to ask on the one hand to force the payment of the men, and ever, expended a portion of his increasing profits in the payment of these whose exertions were necessary to keep him in a state of prosperity. Why should not the settler pay for the men who were to tend them? He said that these convicts were brought here, the convicts would be saddled with the expense of police and prisons, and other means of coercing them; and that the earnings of men who never left the colony would be sent to the mother country would be taken to support the system. If source of revenue was wanted, let the price of slaves be lowered even to a, an acre; but he did not see why a man should be allowed to graze his sheep on the land of the colony, and to keep paying. There was no such want of labour as would justify their importation of convicts at the cost of the Crown—or the compelling them to the people of New South Wales to prosecute their own industry, and to force the payment of the men who desired needlessly to increase his flock, and he said that he would pay for the servants who were to tend them as well would it be for the merchant who saw his wealth increasing, to ask on the one hand to force the payment of the men, and ever, expended a portion of his increasing profits in the payment of these whose exertions were necessary to keep him in a state of prosperity. more convenient day to ensure a good attendance of the people of the district, and that they may attend from a considerable distance. The following resolution was then put and carried—That the following members of Committee collect the amount of subscriptions and give receipts for the same, and that they should best endeavour to raise further subscriptions. The names of the collectors were: Richard Coffey, Charles Maraden, and J. M. Quidde; also that they act in conjunction with each other, and that they immediately receive money received by them to the "treasure." It was originally intended that the present meeting should name the prizes and stewards, but a member very sagely pointed out that it was best to know the names first, and accordingly a resolution was passed to that effect, which is as follows—"That as it is advisable before prizes are fixed that the amount of subscriptions should be ascertained, it is resolved that the Committee meet on Monday evening, Tuesday evening, the 10th November, at Richard Coffey's Hotel, when the amount collected reported by the sub-committee before-named and the prizes and stewards fixed and reported to the Committee. The names of the prizes to have a ladies' prize, subscribed only by ladies. The sub-committee had lists of names, and felt overjoyed at the task laid upon them of addressing the ladies for subscriptions. The prizes were fixed at £10, £5, £3, £2, £1, and an excellent day's sport was anticipated. After some other minor resolutions, the committee adjourned until the proximo.

COMING OF RESCUERS.—The next sitting of the Committee of Rescuers for the district of Windsor, takes place on Monday, the 11th November, next. The last day for issuing summonses was on Monday last, when cases were entered in the £30, and nine in the £10.

THE WEATHER.—It commenced raining heavily on Monday evening, continued steadily all Tuesday, and looks rather threatening at present. The hay crops being ripe, will not benefit much by the winter rains. The crops of wheat and barley, and the vegetables, it will do an immense good. We shall, without doubt, have one of the best crops of every thing this season ever happened in the district. An unusual wet season, our weather could not have, will something be done?

REVIVAL OF TRANSPORTATION.
To W. C. Wentworth, Esq., M.C. Sir,—If, contrary to the unanimous opinion of the Committee of Rescuers, the revival of transportation, has been manifested this day at a public meeting by the citizens of Sydney and other colonies, and your Committee should recommend that you also move an address to His Excellency to place on next year's estimate £60,000, for the purpose of defraying the wages of English, of three thousand free and convict labourers, who should be sent to their families, who shall leave at the rate of three to one for every convict who is sent direct from England.

"We, the undersigned, are pledged to these English who have come to this colony, that they should not have to compete with any other form of direct convict labour; that on that faith the emigrants left their homes, and that you break faith now with them by turning against them, and sending them to the colonies, must oblige you to send said emigrants and their families back to their former homes at the expense of the colonies of the Home Government, or both combined."

Yours, &c., &c.,
M. C.

NEW ZEALAND.

EXECUTION OF ONE OF THE REBELS.—The Court appointed to try the rebels, who were taken prisoners by the late military operations in the neighbourhood of Wanganui, commenced its sittings on Monday morning. The Court was composed of the following: Major Armstrong, Judge Richmond; Captain O'Connell, Judge Williams; Captain Armstrong, Captain Hall, both of the 1st Regiment of New Zealand Infantry; and the Royal Artillery. Mr. Servantes acted as Interpreter. The prisoners, who were confined on board the "Hector," were taken to the Court, and were delivered over to the custody of the military. The first prisoner tried was Rangiatea, one of the rebels who was taken prisoner on the 10th of August. This man either is or affects to be insane, and the Court, after consulting with the jury, has acquitted the extreme penalty of the law. He was sentenced to be imprisoned for life. The next prisoner tried was Rangiatea, who was taken prisoner on the march by the militia about the same date, was tried the following day. This case was also tried by the same Court, and he was sentenced to be hanged. The third prisoner tried was Rangiatea, who was taken prisoner on the 10th of August. This man either is or affects to be insane, and the Court, after consulting with the jury, has acquitted the extreme penalty of the law. He was sentenced to be imprisoned for life.
